5. FIRE FIGHTING MEASURES

| | |
|--|--|
| Flash point: | Not applicable |
| Autoignition temperature: | Not determined |
| Flammable/Explosive limits - lower: | Not determined |
| Flammable/Explosive limits - upper: | Not determined |
| Extinguishing media: | Foam, dry chemical or carbon dioxide. Water fog. |
| Special firefighting procedures: | Firefighters should wear self-contained breathing apparatus. Water may be ineffective, but may be used to cool exposed containers to prevent pressure build-up and possible auto-ignition or explosion when exposed to extreme heat. If water is used, fog nozzles are preferable. |
| Unusual fire or explosion hazards: | None identified. |
| Hazardous combustion products: | Smoke. Oxides of carbon. Acetic acid |
| Sensitivity to Mechanical Impact: | None |
| Sensitivity to static discharge: | None |

6. ACCIDENTAL RELEASE MEASURES

Use personal protection recommended in Section 8, isolate the hazard area and deny entry to unnecessary and unprotected personnel.

| | |
|-----------------------------------|--|
| Environmental precautions: | Prevent further leakage or spillage if safe to do so. Do not allow product to enter sewer or waterways. |
| Clean-up methods: | Keep unnecessary personnel away. Ensure adequate ventilation. Wear appropriate protective equipment and clothing during clean-up. Dispose of contaminated material as waste according to Chapter 13. |

7. HANDLING AND STORAGE

| | |
|------------------|---|
| Handling: | Avoid breathing vapors or mists of this product. Use only in well-ventilated areas. Wash thoroughly after handling. |
| Storage: | Protect from freezing. |

For information on product shelf life, please review labels on container or check the Technical Data Sheet.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Employers should complete an assessment of all workplaces to determine the need for, and selection of, proper exposure controls and protective equipment for each task performed.

| Hazardous components | ACGIH TLV | OSHA PEL | AIHA WEEL | OTHER |
|----------------------|---|----------|-----------|-------|
| Boric acid | 6 mg/m ³ STEL Inhalable fraction. 2 mg/m ³ TWA Inhalable fraction. | None | None | None |

| | |
|------------------------------|---|
| Engineering controls: | Work should be done in an adequately ventilated area (i.e., ventilation sufficient to maintain concentrations below one half of the PEL and other relevant standards). Local exhaust ventilation is recommended when general ventilation is not sufficient to control airborne contamination. |
|------------------------------|---|

Respiratory protection: No personal respiratory protective equipment normally required. Proper selection of respiratory protection depends upon many factors including duration and level of exposure and conditions of use. Observe OSHA regulations for respirator use (29 CFR 1910.134).

Eye/face protection: Safety glasses with side-shields.

Skin protection: Wear suitable protective clothing.
