Field Level Hazard Assessment

Risk Matrix

Severity	Major	1	1	1
	Serious	2	2	1
	Minor	3	2	1
		Low	Medium	High

Frequency

Chance of occurring is indiscernible from zero	Possibility of occurring in 3 years	High probability of occurring in 3 years
--	-------------------------------------	--

Major:
Any incident that may cause: fatality, lost time, catastrophic failure, or loss of equipment or building. Environmental event that is catastrophic or is requiring extraordinary means to remedy.

Serious:
A medical treatment by a doctor, but does not result in a lost time. Equipment is not usable, but can be repaired. Environmental damage requires specialized equipment or tools to clean up.

Minor:
An incident that does not require outside medical attention. Equipment was damaged, but can still be used. Environmental spill can be easily cleaned up.

- 1. Do not proceed** – Risk is too great.
- 2. Do not proceed**- Job will require engineering controls, administrative controls, or specialized PPE. Proceed only after risk has been addressed.
- 3. Proceed** with caution. Standard PPE may be required to carry out task.
